## Naugatuck Valley Radiology Ordering Information

This manual is designed to provide our referring physicians offices with up-to-date scheduling guidelines and important information when ordering radiology exams for their patients. Because of frequent changes and updates, we have created this electric manual in lieu of distributing hard copies to your offices. We will update this page as needed; therefore, we recommend that you bookmark this page and refer to it when sending patients to Naugatuck Valley Radiology.

If you have any suggestions for additional information that you would like to see on this site please contact Kacie Kurdy at 203-267-3340 x 1143 or [kkurdy@nvrnet.com](mailto:kkurdy@nvrnet.com)

## General Information

### Locations

1389 West Main Street  
Tower 1, Suite 107  
Waterbury, CT 06708  
Tax ID: 06-1502461  
NPI: 1336161918  
Tax ID: 06-1239526 (*MRI ONLY*)  
NPI: 1134141716 (*MRI ONLY*)

166 Waterbury Road  
Suite 105  
Prospect, CT 06712  
Tax ID: 06-1620962  
NPI: 1154343739

385 Main Street South  
Building 2  
Southbury, CT 06488  
Tax ID: 06-1487582  
NPI: 124525824

<b>WELLCARE OF CT – All Plans</b> Call EviCore @ 1-888-333-8641	<b>PreCerts Required:</b> CT, MRA, MRI, Cardiac Imaging, Nuclear Medicine, Cardiac Echo - 93306
<b>WORKERS COMPENSATION</b> (Date of Injury and Claim Number are required)	<b>Information Required:</b> <ul style="list-style-type: none"> <li>• Name and phone numbers of patient’s workers compensation carrier</li> <li>• Employer name and address</li> <li>• Private Insurance Information</li> </ul>

# Mammography

Preparation: Patients cannot wear any lotions, powders or deodorant on the breast or underarm area.

## Screening Mammogram

- It is recommended that all women greater than 40 years of age or women under 40 with a strong family history of breast or ovarian cancer have a yearly screening mammography.
- Patients must be asymptomatic
- 1 year since last screening mammogram
- For patients with known dense breast tissue (greater than 50% dense), a screening breast ultrasound can be done in conjunction with the mammography

## Diagnostic Mammogram

- Performed when a radiologist is on-site to evaluate the images
- Unilateral or Bilateral Mammogram that meets one of the following criteria
  - Breast Pain
  - Lump/Mass
  - Nipple Discharge
  - Skin Changes
  - Suspected Implant Rupture or Leakage
  - Gynecomastia (male patients)
  - Short Interval Follow-up as recommended by the radiologist
- It may be recommended that an ultrasound be performed at the same time as the diagnostic mammogram

## Additional Information:

1. If the patients prior breast imaging was not performed at one of our facilities, we will need information on the previous facility so that we can obtain the records
2. If a patient is symptomatic, requiring a unilateral mammogram within at the time of their yearly, bilateral exam being due, a bilateral diagnostic mammogram should be ordered
3. Patients will fill out a breast history sheet to be reviewed by the technologist before the exam is performed. If the patient's history indicates that a diagnostic mammogram is necessary, it will be reviewed with the radiologist on-site and a diagnostic exam may be performed at his or her discretion. If there is no radiologist on site, the patient will be rescheduled to a new date/time.
4. It is recommended that patients check with their insurance company regarding their coverage. For example, breast ultrasound is a covered benefit in the State of Connecticut, but it typically is applied to a patients deductible and they will have an out of pocket expense.

## Bone Density

Preparation: Cannot take any solid calcium supplements for 24 hours prior to appointment. Cannot be performed within 10 days of oral or IV contrast.

Indications:

- Post-Menopausal
- Osteoporosis
- Prolonged steroid use
- Significant loss of height
- History of skeletal fractures

A bone density test is typically covered by insurance companies once every 2 years (3 years for BCBS) unless the patient has a confirmed diagnosis of osteoporosis and is taking a disease modifying medication.

## MRI Scheduling Guidelines

Precertification may be required by the patient's insurance carrier. If you would like us to assist in obtaining the prior authorization, please contact our prior authorization specialists at 203-264-7999 ext. 2008

Patients with the following cannot be scanned:

- Cardiac Pacemakers
- Defibrillators

Patients with the following can be scanned:

- Surgically Implanted Metal (joint replacements, surgical clips, plates/rods) implanted at least 6 weeks prior
- Dental work
- Brain Aneurysm Clips (if MRI compatible)
- Stents (if MRI compatible)

Patients with the following will need prior x-rays to screen for foreign bodies:

- Metal in the eyes, head or skin

### Additional Information

1. Precertification may be required by the patients insurance carrier, we can facilitate this at your request.
2. If the patient wears a glucose monitor, it will need to be removed prior to the MRI
3. For patients with a stent, we will ask the patient for the stent card to verify that it is MRI compatible
4. Patients will be pre-screened prior to their appointment. If it is determined that they could potentially have a metallic foreign body in their eyes, head or skin, we will contact your office to send an order for an x-ray of that body part

## MRI Brain

Indication/Symptoms	Without Contrast CPT 70551	W/WO Contrast CPT 70553
Headaches	X	
Dizziness/Vertigo	X	
Memory Loss	X	
Mental Status Changes	X

## CT Scheduling Guidelines

Precertification may be required by the patient's insurance carrier. If you would like us to assist in obtaining the prior authorization, please contact our prior authorization specialists at  
203-264-7999 ext. 2008

In accordance with the American College of Radiology guidelines, we require creatinine bloodwork within 2 months of receiving CT contrast for patients with the following contraindications/risk factors:

- Patients with a history of kidney disease including
  - Prior dialysis
  - Kidney transplant
  - Single kidney
  - Kidney surgery
  - Kidney cancer
- Hypertension requiring medical therapy
- Diabetes mellitus

## CT Head/Brain

Indication/Symptoms	Without Contrast CPT 70450	W/WO Contrast CPT 70470	CTA with contrast CPT 70496
Headaches	X		
Trauma	X		
Memory Loss	X		
Mental Status Changes/Confusion	X		
Vertigo	X		
TIA	X		
CVA	X		
Bleed	X		
Migraines	X		
Tumor/Mass		X	
Cancer/Metastatic Disease		X	
Aneurysm		X	X

## CT IAC's

Indication/Symptoms	Without Contrast CPT 70480	With Contrast CPT 70481
Otitis Media/Ear Pain	X	
Trauma	X	
Hearing Loss	X	
Cholesteatoma	X	
Tumor/Mass		X
Acoustic Neuroma		X

## CT Orbits

Indication/Symptoms	Without Contrast CPT 70480	With Contrast CPT 70481
Fracture	X	
Trauma	X	
Pain	X	
Mass		X
Cellulitis		X

## CT Sinus

Indication/Symptoms	Without Contrast CPT 70486	With Contrast CPT 70487
Sinusitis	X	
Sinus Pain/Pressure	X	
Pre-op (specify Acclarent or Medtronic on RX)	X	

## CT Facial Bones

Indication/Symptoms	Without Contrast CPT 70486	With Contrast CPT 70487
Trauma	X	
Fracture	X	
Swelling		X
Infection		X
Tumor/Mass		X

## CT Soft Tissue Neck

Indication/Symptoms	Without Contrast CPT 70490	With Contrast CPT 70491	W/WO Contrast CPT 70492	CTA with contrast CPT 70498
Salivary Stone			X	
Parathyroid Adenoma (4D CT)			X	
Lymphadenopathy		X		
Mass		X
